

Sunless Inc.

Global Leader in Spray Tan Technology.

BOOTH OVERVIEW	<p>Mystic Tan Unity - Where Color and Technology Come Together - Achieving the perfect tan has never been easier with the new Mystic Tan Unity™ spray booth. Unity™ offers the most technologically advanced, personalized spray tanning experience on the market. With Unity's™ customizable solution mix and MagneTan® Spray System, clients of all skin tones will be guaranteed a natural, flawless looking tan every time. The Mystic Tan Unity™ app puts the power of customization in your clients' hands. This app-based session tool guides tanners through spray tanning education, skin color & solution selection recommendations, and spray tan session instruction.</p>	<p>Versa Spa – Beyond The Tan – Versa Spa brand was created for the person who lives a wellness lifestyle. In their definition of beauty, the word “healthy” is included. Interested in taking care of themselves and preventing the signs of aging and knows the role that good skin care plays in this. We developed Versa Spa solutions to include the latest in high end anti-aging ingredient which is the powerful green and brown marine algae blend that diminishes fine lines and wrinkles, detoxifies the skin, and keeps the skin hydrated. All of this...plus... great active tanning ingredients that provide a healthy bronze glow.</p>	<p>Mystic Tan - The Color of Confidence - When defining the Mystic Tan brand, we thought about the person who defines beauty as the ability to express their personal style. It's about individuality and the ability to make choices depending on your mood, style or a specific event. We know you love customization, from creating your perfect coffee order to customizing your dream car, workout plan, frozen yogurt, and manicure/pedicure. With Mystic you can choose your level of color, your color of bronzer along with your fragrance or combination of fragrances that can deliver an everyday natural tan or a deep dark island tan. With Mystic it's all about the fun of making choices!</p>

Plus the exhaust filter cleans itself after every session!</p>	<p>Automatic Washdown System - Automated waterfall type wash-down system, rinses booth automatically after each session.</p> <p>Drainage - A floor draining system removes excess water & solution after the misting and wash-down processes.</p> <p>Extraction Fan System - High-volume extraction fan system creates an overspray-free environment.</p>
MECHANICS	<p>The Mystic Tan Unity uses a single electrostatic spray nozzle to provide a fast, uniform tan that can wrap evenly around otherwise shadowed surfaces. Two rotational motors provide vertical and horizontal motion to the fixed spray nozzle. An air compressor is used to set up a vacuum pump effect that draws the custom mixed tanning solution from a single session cup to provide two fine mist passes for full coverage.</p>	<p>The VersaSpa Pro uses a linear translation stage to drive the movement of the 3 spray nozzles over the full height of the tanner. A piston pump supplies metered doses of solution to an air turbine that creates the large drop-let spray that provides a quick, even tan over 4 separate passes.</p>	<p>The Mystic Tan uses a single electrostatic spray nozzle to provide a fast, uniform tan that can even wrap around otherwise shadowed surfaces. Two rotational motors provide vertical and horizontal motion to the fixed spray nozzle. An air compressor is used to set up a vacuum pump effect that draws the pre-mixed tanning solution from a single reservoir to provide 2 fine mist passes for full coverage.</p>
